These tables reflect the removal of the 10% rate band for PAYE income from the tax year 2008-09.

Using this booklet - weekly paid

The tables in this booklet will help you work out PAYE tax deductions with a calculator.

Round down taxable pay to the nearest pound.

Throughout these tables, 'taxable pay' means any amount of pay after you have used the Pay Adjustment Tables, Tables A and entered the amount in Column 5 of the P11. For Codes D0 and BR round down whole pay to the nearest pound.

- For Code D0 multiply the whole pay by 0.40 (40%) to find the tax deduction at the Higher Rate.
- For Code BR multiply the whole pay by 0.20 (20%) to find the tax deduction at the Basic Rate.
- For all other Codes follow the sections below in turn to calculate the tax deduction.
- For codes on a Week 1 basis, use the Week 1 figures for each calculation if the employee is paid weekly.
- For codes on a Month 1 basis use the Month 1 figures for each calculation if the employee is paid monthly.

The Weekly chart below will help you work out which week number to use, then go to pages 3 and 4.

This is the same as the P11 week numbers.

Step 1

Deduct the figure in Table C from the taxable pay figure in Column 5 of the P11 for the week you are currently working out. Round down the result to the nearest whole pound and keep a note of this figure.

Step 2

Multiply the result of **Step 1** by 0.40 (40%). This gives you the tax due on the part of the pay that is taxable at the higher rate.

Step 3

Add to this the tax due at the Basic Rate for the relevant week, from the table on the right.

Step 4

Enter this figure on the P11.
